Education

Bachelor in Data Science

Institution: Aalto University,

School of Science

Major: Data Science

Year of graduation: 2025

GPA: 4.75 with 154/180 credits

High School for Gifted Students

Year of graduation: 2021

SAT: 1580

About me

I am a 3rd year Vietnamese University student studying in Aalto University, majoring in Data Science with a minor in Statistic. I have ambition in expanding my experience and to specialized in data analysis.

In my University, I was once responsible as the Study coordinator and Treasurer for DataGuild, the guild for English speaking data science student.

Hard skills

- 3 years experience C# with Unity
- C, C++
- Python, Scala and basic R
- Git with github
- Microsoft Office
- Languages:
 - Vietnamese (Native)
 - English (Full working proficiency)

Soft skills

- Team work
- Taking initiative and responsibility
- Creativity

Experiences

Work experience

Solo Game Developer

Freelance: <https://fetss.itch.io/>

2019 - 2022

- I started coding games due to my passion for game development. I learned patience, problem solving skills and team work through group projects.
- 3 of my games have been published on a major content platform.

Game Developer at Dyscordion Entertainment

2021 - 2023

- I worked at Dyscordion Entertainment as a freelance developer.
- I worked on UI and core systems on their projects.

Freelance Game Development at HypeHype

2023 - now

- After a 3 month period of internship, I was given the opportunity to work with a small team, developing games on HypeHype's platform using their tools.
- I learned to coordinate and teamwork in a professional environment.

Projects

Data analysis project for OP

https://github.com/OttoVintola/data_science_project_group3

- A group projects where we work with OP to create a tool to analyze the trend of key economic factors in different regions in Finland.

Skiiiiiii

<https://fetss.itch.io/skiiiiiii>

- A submission to a "low code" game jam that I decided to make almost entirely with formulas in Excel.
- One of the most interesting coding challenge I have had.

Unfold

<https://github.com/PhamQuangBach/Unfold>

- A Python program that unfold 3D models into foldable modular origami crease patterns.
- Born from my love of experimentation and paper folding
